SUMMARY

Software Developer with 1 year of experience building scalable systems. Optimized SQL queries to process over 1M records and developed PHP backends ensuring sub-2-second response times. Passionate about solving complex challenges and driving innovation with Laravel and PHP in a Developer role.

EXPERIENCE

Software Developer

Kudos

November 2024 - Present, Chile · Remote

- Designed and implemented SQL queries that efficiently process over 1,000,000 records in relational tables through optimized indexing and joins.
- Developed a PHP backend architecture that maintains consistent response times under 2 seconds across all system operations.
- Implemented a minimalist interface that prioritizes server-side over client-side processing, enabling optimal performance on low-resource equipment.

Software Developer

Colegio Marcela Paz

July 2024 - November 2024, Concepcion, Chile · Hibrid

- Built a strategic planning system based on Spring Boot and microservices architecture that unifies management of 10+ departments, enabling real-time tracking of KPIs and objectives.
- Implemented Google API integrations that automate data synchronization for 200+ users, eliminating the need for manual entry.
- Developed adaptive user interfaces that reduced training time for new system users by 20%.
- Participated in weekly meetings to discuss project progress and collaboration with team members, improving communication and alignment within the development team.

PROJECTS

Order and Inventory Management System

DolceMimi · August 2024 - October 2024

- Development of a comprehensive inventory and order management system for a bakery, optimizing order processing and inventory tracking.
- Design and implementation of backend using PHP and Laravel, ensuring efficient data handling and user authentication.
- Development of user interface with Inertia and React, implementing inventory and order management functionalities.

EDUCATION

Associate's degree, Computer Science

Universidad Técnica Federico Santa María · Chile · 2025

High School Diploma

Colegio San Gabriel Arcángel · Chile · 2016

CERTIFICATIONS

EF SET Certificate English 78/100 (C2 Proficient)

EF Standard English Test (EF SET) · 2023

SKILLS

Industry Knowledge: Microservices, API Development, Object-Oriented Programming (OOP), Model-View-Controller (MVC), Agile Methodologies.

Tools and Technologies: PHP, Laravel, Javascript MariaDB, Java, Spring Boot, Spring Security, Spring Data, Hibernate, JPA, REST APIs, PostgreSQL, MySQL, Git, GitHub, Postman API, JDBC, Python.

Interpersonal Skills: Critical Thinking, Adaptability, Communication, Teamwork, Time Management.

Languages: English and Spanish.
